"The exhibits afford evidence of excellent work in the different departments embraced, while the general plan and purpose of the institution also entitle it to commendation. Besides the college proper, the institution embraces a well-organized Preparatory School, in order that none may have an excuse for ignorance of the ordinary English branches, proficiency in which should be everywhere considered a prerequisite to admission to a commercial school."

Branches Taught:

Book-keeping, Penmanship, Arithmetic, Mental Arithmetic, Banking, Business Correspondence, Customs and Forms, Commercial Law, and the practical English branches that are most useful in business life.

Hours of Instruction:

College session from 9 A.M. to 2 P.M. Afternoon school from 3 to 5. Night school from 7 to 9.

COMPARATIVE VALUE OF MALTINE AS A CONSTRUCTIVE.

It has been clearly shown by the most distinguished chemists in this country and Europe, who have made comparative analyses of **MALTINE** and Extracts of Malt that, quantitatively, **MALTINE** contains from two to three times the nutritive and digestive properties that are found in the best Extracts of Malt in the Market.

This fact has been amply demonstrated by the concurrent opinion of the most eminent medical authority in the world; and the practical experience of nearly the entire medical profession of the United States and Great Britain proves beyond question that **MALTINE**, as a constructive, is by far the most valuable product yet presented for the consideration of scientific medical men.

Being supplied at the same prices as the ordinary Extract of Malt, and *containing fully double the quantity of Diastase and nutritive elements to be found in the best of them*, it can be prescribed at less than one-half the expense.

Extracts showing the value of MALTINE in comparison with Extract of Malt, and as a Constructive:

In order to test the comparative merits of **MALTINE** and the various Extracts of Malt in the market, I purchased from different druggists samples of **MALTINE** and of the most frequently prescribed Extracts of Malt, and have subjected them to chemical analysis. As the result of these examinations, I find that **MALTINE** contains from half as much again to three times the quantity of phosphates, and from three to fourteen times as much diastase and other albuminoids as any of the Extracts of Malt examined.

PROF. WALTER S. HAINES, M.D.,
Professor of Chemistry and Toxicology, Rush Medical College, Chicago.

In comparison with the alcoholic Malt Extracts, your **MALTINE** is about ten times as valuable as a flesh former; from five to ten times as valuable as a heat producer; and at least five times as valuable as a starch digesting agent.

PROF. ATTFIELD, F.C.S.,
Professor of Practical Chemistry to the Pharmaceutical Society of Great Britain.

MALTINE is superior in therapeutic and nutritive value to any Extract of Malt made from barley alone, or to any preparation of one variety of grain.

PROF. R. OGDEN DOREMUS.

In its superiority to the Extract of Malt prepared from barley alone I consider it to be all that is claimed for it, and prize it as a very valuable addition to the list of tonic and nutritive agents.

C. H. LEWIS, M.D., *Jackson, Mich.*

The following is an extract from a report of WM. PORTER, A.M., M.D., St. Louis, Mo.:

After a full trial of the different oils, and Extract of Malt preparations, in both hospital and private practice, I find **MALTINE** most applicable to the largest number of patients, and superior to any remedy of its class.

CHICAGO, January 21, 1880.

I am very much pleased with **MALTINE**, and since its introduction here I have entirely given up the use of Extract of Malt.

PROF. A. F. INGALLS, A.M., M.D.

PROFESSOR L. P. YANDELL, in *Louisville Medical News*, says: **MALTINE** deserves to stand in the front rank of the constructives; and the constructives, by their preventive, corrective, and curative power, are probably the most widely-useful therapeutical agents that we possess.

ANN ARBOR, MICH., July 2, 1880.

GENTLEMEN:—The preparations of **MALTINE** I have already used have impressed me as being not only superior to barley malt as a nutrient tonic, but as furnishing an admirable vehicle for the combination of other tonics. The preparations with cod-liver oil, with pepsin and pancreatine, and with phosphates, as well as the malto-yerbine, I have especially liked. I have used no "Barley Malt" since I have been able to obtain the **MALTINE**.

HOWARD METHOD OF VOCAL TRAINING.

AS TAUGHT ONLY BY

R. ELLIOTT CLARKE.

REMOVED TO NEW ROOMS, 1514 CHESTNUT STREET.

THE new and elegant rooms of the above method are now open for the reception of pupils of both sexes. This method is based upon strictly scientific principles and is equally applicable for either *Singing, Public Speaking, Reading, or the Cure of Vocal Defects*; such as *Stammering, Stuttering, Spasmodic Hesitation, Harsh, Cracked, or Weak Voices, Short Breath, Clergymen's Sore-Throat*, and all other vocal defects resulting from an improper use of the vocal organs. Persons afflicted with throat or lung affections are treated by specialists, *not manufactured diploma doctors*, but eminent physicians of this city,—regular graduates, and well-known among the medical fraternity and to the general public as eminent practitioners in their special departments. The success achieved by the undersigned, during last season, in treating the voice, has been gratifying in the highest degree to pupils of all classes, representing teachers of the voice, heads of conservatories, ministers, lawyers, singers, actors, readers, and public speakers, whose vocal powers were failing, as scores of enthusiastic testimonials attest.

THE METHOD EXPLAINED.

THE HOWARD METHOD regards the voice as the passive result of a bodily effort as positive as the effort to take a book from the table. To raise the book, the fingers, the hand, the arm must be moved into new positions, by *contracting muscles*. So, to sing or speak a tone, certain parts of the throat must be turned around, raised, drawn together—in short, moved into position, by *contracting muscles*. These movements shape the throat into the most perfect of all musical instruments. The vocal chords are properly stretched and adjusted; but to be thrown into vibration they now require a heavy pressure of air from below, from the reservoir of the lungs.

To gain this powerful upper pressure of breath the lungs must be squeezed or compressed, by drawing inward upon them the parts of the body surrounding them, such as the ribs and the diaphragm; and again the agency must be *contracting muscles*.

The Howard Method deals directly with these muscles themselves instead of needlessly seeking to control the tone, which is the simple result of their contraction. By easily-learned movements of the parts of the throat, it gives the scholar the power to bring into voluntary action certain normal vocal muscles, while by other movements it effectually opposes all false or forcing muscles. For nearly all faults of delivery are due not to any weakness of the vocal parts, but to the action of interfering or forcing muscles, which have no rightful concern in the vocal act. So, by the same plan, the respiratory movements are brought under control.

In a word, the scholar is taught to manage the vocal machine, instead of trying to remodel the vocal fabric after manufacture. Virtually this grand mistake is made by nearly all the methods now in vogue; for they dwell mainly upon the influence of the mouth, not knowing the acoustic fact that nearly all radical faults are committed in the throat, or by the respiratory organs before the mouth is reached, and that the mouth has little influence over the individual quality, pitch, or power of the voice, save as it models the tone, already formed in the throat, into the various vowels of the language,—a task well learned in infancy,

and requiring only the most general directions for the more exalted efforts of declamation.

[The results of this physical method are surprising, almost incredible. *The delivery is generally revolutionized in a single mouth*; not only is the power of every voice at least doubled, and its scale extended from three to six notes, but the quality becomes pure—not simply modified and improved, but absolutely pure and resonant throughout its entire compass.]

To this point—the recovery and enlarged control of the natural functional process—the method is equally valuable for speakers and singers, and has been applied with unvarying success by lawyers, clergymen, public speakers, readers, and actors, whose vocal powers were failing.

Public Speakers gain from their increased compass such richly-modulated inflections, and from their enlarged volume of tone such striking contrasts of power, that the grand faults of monotony and mannerism give place to a varied and effective delivery.

[*A short breath, a weak voice, a limited compass, are proved to be the rarest of rare phenomena.* Protracted effort can be endured without fatigue. The full use of the vocal powers affords pleasure instead of pain, even when serious fears have been entertained on account of catarrh, clergymen's sore-throat, or irritation; acute bronchitis being apparently the only throat affection which materially impairs the full and strong vibration of the vocal chords, when once the functional process has been restored.]

Mr. Clarke exhibits these statements, not in a spirit of speculative bravado, but with full confidence, and with the hope that they may be critically examined and put to the practical test. He knows, and unhesitatingly asserts, that the whole rank and file of voice-teachers are either contradicting or practically ignoring the fundamental laws of tone which have been disclosed by the wonderful acoustic discoveries of the past few years; that they employ exercises which improve the voice a little, if at all, only at the ruinous expense of the natural functional process; that they often confirm the very errors they have undertaken to remove; that, certainly, they do not touch the radical faults of laryngeal or respiratory muscular action.

PREFACE.

THE REGISTER, though a small volume, represents five months of diligent and careful labor on the part of four experienced persons. Its purpose is not to discriminate between competent and incompetent practitioners, or between those physicians who practice according to the established ethics and those who do not, but simply to embrace, in a convenient form, the information mentioned in the title-page.

It contains the names of fourteen hundred and eighty-three physicians, exclusive of those who graduated in March, 1881, of whom two hundred and thirty-seven are Homœopathic and forty-nine women. Six hundred and twenty-six graduated at the University of Pennsylvania, four hundred and fifty-four at the Jefferson Medical College, forty-two at the Woman's Medical College, and one hundred and seventy at the Hahnemann Medical College, including fifty-six who graduated at the Homœopathic Medical College of Pennsylvania, which merged in the Hahnemann in 1869. These are all Philadelphia colleges in active operation to-day, and their records were examined for the purpose of verifying the statements of those physicians who claimed to have graduated from them. In every instance where there was the least doubt as to the identity of the individual, his diploma was called for and seen. Forty-five graduated at the Pennsylvania Medical College and twenty-one at the Philadelphia Medical College, both reputable institutions at one time, but not now in existence. Of these, the diplomas of all were seen, except four from the former college, and an old official list of its graduates was examined and their names found thereon. One hundred graduated at forty other American Colleges, and their diplomas, with three exceptions, were carefully examined. One whose diploma was not shown is a surgeon in the U. S. Navy, and the Deans of the respective colleges vouched for the other two. Twenty-nine graduated at nineteen different European institutions, and their diplomas and State examination papers were all seen and scrutinized, except four, two of whom are members of the Philadelphia County Medical Society, and all are physicians of recognized standing, and were, moreover, vouched for by prominent members of the profession. Seven graduated at a Philadelphia institution, the name of which, for reasons apparent to the profession, we have omitted from the Register. These physicians, however, are in good standing and graduated from sixteen to twenty-four years ago, having completed the prescribed course of study and received their diplomas, which bear the signatures of reputable and prominent physicians still practicing in this city, and who then constituted the faculty.

The information concerning the charitable, humane, and other institutions of the city given in the Register, was condensed from the by-laws and printed reports of the institutions, and is, consequently, correct.

The public and the medical profession can, therefore, judge intelligently of the general accuracy and reliability of the work.

To the large number of physicians who so kindly assisted us with valuable suggestions and information, we return our thanks.

THE CORONER.

The present Coroner is William S. Janney, M. D. The duties of this officer are declared in the Act of 22d of March, 1867, to be:

"To hold an inquest on the body of any person who shall have died of violent death, or whose death shall be sudden, provided such sudden death be after an illness of less than 24 hours, and no regular practicing physician shall have been in attendance within that time; or that suspicious circumstances shall render the same necessary; which said suspicious shall first be sworn to by one or more citizens of the city."

When a physician is requested to give a certificate of death, resulting as set forth in the above Act, he should refuse to do so, and immediately notify the Coroner. And where a physician is called to attend a patient injured by the criminal act of another, and is likely to die, he should at once notify the Coroner. If he believes, however, that death is imminent, he should forthwith inform the patient of approaching death, and proceed himself to take his dying declaration, and not seek a policeman or other officer, as is too often the case. With such evidence, the offender can be arrested and tried for the crime.

MIDWIFERY.—Every practicing physician and every practitioner of midwifery of the city of Philadelphia,

is required by law, to report his or her name and place of residence, to the Health Officer, at the Board of Health. Should any such person remove to any other place of residence, it is his or her duty to notify the Health Officer of the fact within 30 days.

Every person, as aforesaid practicing midwifery, under whose charge a birth shall take place, shall keep a true and exact register of such birth, and shall enter the same on a blank schedule, to be furnished by the Health Officer. PHILADELPHIA ORTHOPEDIC HOSPITAL & INFIRMARY FOR NERVOUS DISEASES.

N. W. Cor. 17th and Summer Sts.

The hospital is devoted exclusively to the treatment of Deformities and Diseases of the Nervous System. All applications for admission as house-patients must be made to the Executive Committee, through its chairman, Alfred Jones, Germantown—the applicant having first obtained from an attending physician or surgeon in the department to which the patient is supposed to belong, a certificate that he has examined the case, that it is one within the scope of the hospital, that in his judgment it can be cured, or permanently benefited, by proper treatment, and that for such treatment it is necessary that the case should be in the house.

Patients when unable to pay any part of the board, or treatment are admitted free, so far as the funds of the Hospital will permit. All others are expected to pay some portion of the expense, a special rate being made in each instance by the committee, based upon such information as they can obtain of the circumstances of the applicants.

HOME FOR CONSUMPTIVES.

411 Spruce Street.

This institution is designed for the accommodation of the destitute and homeless, afflicted with Consumption. The Home is not so much a hospital, confining

its beneficence to the inmates actually within its walls, as a central ministering agency, from which, through its system of out-door relief, the poor Consumptives in all parts of the city may be properly cared for.

No fee is charged for admission to the Home, and no discrimination is made by reason of nationality, creed or color, but it is expected that those who avail themselves of the charity thus bestowed, will conform to the ministrations of the Protestant Episcopal Church. This rule does not apply to patients at their own homes.

Donations of money, clothing and supplies, are earnestly solicited, and should be marked "For the Consumptive's department." Rev. Samuel Durborow, Superintendent, No. 411 Spruce St.

Applicants for the bounty of the Commonwealth of Pennsylvania must be between the ages of ten and twenty years; and before they can be admitted, satisfactory evidence must be furnished, from respectable persons of their neighborhood, of the pecuniary inability of the parents, and of the good natural intellect of the child, and its freedom from any constitutional malady that might incapacitate it for instruction.

On application to the Principal of the Deaf and Dumb Institution, Philadelphia, by letter or otherwise, a paper with printed questions and blank spaces for answers will be forwarded. After the paper has been filled out, it must be returned to the Institution. The applicant will soon be informed of the result of the application.

Bet. Market and Haverford Sts. and 42d and 49th Sts.

All classes of insane persons, without regard to the duration of the disease or of its curability, are admitted into this Institution. Idiots, however, it may be stated, are not received; and for the epileptic, a special agreement should be made.

Cases of Mania-a-Potu are not received into this Hospital; but into that at Eighth and Pine streets, exclusively.

Preparatory to the reception of a patient, it is necessary to arrange the rate of board, etc., with a member of the Board of Managers, and to furnish a certificate of the patient's insanity from two or more physicians, who shall have examined the patient within six days of its date, and the same shall be acknowledged and sworn or affirmed to before some magistrate or judicial officer, as required by an Act of the Legislature. A request that the individual may be received in the Institution must likewise be made by a near relative or friend. A full and detailed history of each case is also particularly requested.

For the payment of board, and removal of a patient when discharged, security is always required from some responsible resident of the city of Philadelphia. Payment for board is always to be made quarterly in advance; and if the patient is removed unenred, before the expiration of the first three months, and contrary to the advice and consent of the Superintendent Physician, board is required for thirteen weeks; otherwise, the charge is only for the time actually passed in the Hospital, provided that time is more than four weeks.

Interest will be charged on bills not paid till after the expiration of the quarter.

Large chambers and private attendants can always be supplied, if desired by the friends of the patients. The number supported without charge is dependent on the amount of the Hospital's income, and the free beds are for indigent, recent and supposed curable cases only. Application can be made at the Pennsylvania Hospital on Eighth street, between Pine and Spruce, where blank forms for physicians' certificates, bond, questions, etc., can always be obtained. Southern Kitchen, 1719 South Ninth Street.

Southwestern Kitchen, 2035 Christian St.

In the month of November, 1875, and since which time it has been in daily operation, the first Sick Diet Kitchen connected with the Philadelphia Protestant Episcopal City Mission, was established at the House of Mercy, No. 411 Spruce street. Subsequently, three other Sick Diet Kitchens have been established, and are in active operation. Still other branches are in contemplation. They all have for their object, the

furnishing to the invalid poor the delicate but nutritious food which is otherwise hopelessly beyond their reach, yet upon which their lives might, under Providence, depend, and without which, medicines, medical skill, and even careful nursing would in many cases avail but little.

Chicken broth, beef tea, soups, mutton broth, oat meal, gruel, roast beef, rice custard, prunes, jellies, corn starch, roast apples, gelatine, bread pudding, rice pudding, tapioca, canned tomatoes, grapes, oranges, etc., have been furnished from the Kitchens. The average number of patients daily supplied from this source has been about one hundred.

Donations of money and supplies are earnestly and respectfully solicited for this branch of the Mission work, and should be specially named "For the Sick Diet Kitchens." Rev. Samuel Durborow, Superintendent, 411 Spruce street; W. M. Runk, Treasurer, 1126 Chestnut street.

THE PENNSYLVANIA SOCIETY TO PROTECT CHILDREN FROM CRUELTY.

Rooms, 1406 Chestnut Street (second story).

It is the earnest wish of all good citizens to shelter the younger members of the community from cruelties against which they are powerless to protect themselves. Adequate laws already exist for the protection of children, but the police force is necessarily occupied with the most obvious and gravest cases of crime. Hitherto no friendly and powerful hand has been habitually extended to rescue these little ones from lives of misery and danger, to place them under the shield of the law, and where natural protection has failed, or has been transformed into brutality, to bring them, by an order of the Court, under the merciful care of some orphan home or other sanctuary provided for the desolate and oppressed. To perform these kindly offices, the Society to Protect Children from Cruelty has been lately organized. It desires to pursue its work, not vindictively, but in a spirit of justice and mercy; with no sectarian bias, but simply

in the interests of pity and humanity toward the injured and defenceless; and its members entreat the co-operation of their fellow-citizens in its aims, and their generous contributions toward the fund necessary for the discharge of the duties it has undertaken to fulfil.

A subscription of \$3.00 annually constitutes membership.

A payment of \$50.00 constitutes Life Membership. Contributions may be sent to the Treasurer or Members of the Board of Managers.

Hon. Daniel M. Fox, President; Peter A. Keller, Treasurer, and Benjamin J. Crew, Secretary.

Should any person know of a girl detained in a house of ill-fame against her will, he will please send a notice to the Mission, or to Rev. B. H. Latrobe, Secretary, 328 Queen street, that means may be taken for her rescue.

The usefulness and perpetuity of this Home depends upon the liberality of the Christian public. Samuel P. Goodwin, President; Isaac P. Welsh, No. 235 North Third street, Treasurer; Joseph K. Wheeler, Secretary.

Applicants for admission, upon calling upon one of the Managers, may obtain the order necessary to admit them. It is supported by the subscriptions and donations of the benevolent, and commends itself to the humane and charitable. Annabella E. Winn, Directress; Sarah Ann Pope, Secretary.

Contributions towards the support of the Home will be gratefully received by the Treasurer, or any of the officers named below.

Laboratory of KEASBEY & MATTISON, Philadelphia. Jensen's Crystal Pepsin was subjected to a test at our laboratory, and 1 grain of it completely dissolved 400 grains of hard-boiled white of eggs in six hours at 105° F.

KEASBEY & MATTISON.

One-quarter grain of your Pepsin dissolved 100 grains of boiled albumen for me, which makes it the strongest and cheapest Pepsin I know of.

D. W. C. WOOD, M. D., Holly, Mich.

I have a physician that has used your Pepsin, and has very good results from it and wishes to prescribe it. Please send me, by first mail, etc.

FRANK SQUAIR, Druggist, 295 & 521 W. Madison St., Chicago.

From the MEDICAL HERALD, Louisville, Ky. Dr. Carl Jensen's Pepsin has the great merit of uniformity of strength, and of security against change in any climate. In my own person it has proved very efficient. J. O. DYER, M. D.

GEO. C. PITZER, M. D., Professor of the Theory and Practice of Medicine in the American Medical College, St. Louis, says, editorially, in the *American Medical Journal*: "Jensen's Pepsin is the best we have seen."

From CH. GATCHELL, M. D., formerly Professor of the Theory and Practice of Medicine, University of Michigan: The Pepsin arrived in good condition, and I have had occasion to try it with very gratifying success. It is more active than any that I have ever before used, and I have taken pleasure in recommending it to the profession. Very truly, CH. GATCHELL.

STAR DEODORIZER and DISINFECTANT.

If you wish health, avoid as far as possible all decomposing matter, and destroy the germs of disease arising from such decompositions with a liberal use of disinfectants.

DIRECTIONS FOR USE.

FOR WATER-CLOSETS.—Put about one-half a pint of this deodorizer in the sink, then take a quart of water, add about a fluid ounce of the deodorizer and sprinkle the floor of the room each morning for a few days, afterwards sprinkling about once a week, will keep the room in good condition.

FOR SICK ROOM.—To one quart of water add one fluid ounce of the deodorizer, then take an old towel, wet it with the diluted solution and hang it in some out-of-the-way part of the room. The towel should be wet once in 24 hours. In cases of contagious disease it should be wet oftener.

FOR GUTTERS AND WATER WAYS.—For lack of proper attention, gutters are often the cause of many cases of the worst forms of disease. Have the gutter well washed first, then take a bucket of water and add about one pint of the fluid and allow the diluted solution to flow down the gutter.

An article like this has long been needed by the community. No house should be without it. It is thorough in its work, destroying disease germs and the effects of foul air immediately. It is applicable in all cases where the purification of the air is necessary, both in doors and out. In half-gallon bottles—PRICE SEVENTY-FIVE CENTS.

NOW COMPLETE. SIXTH EDITION, GREATLY ENLARGED.

COOLEY'S
CYCLOPÆDIA OF PRACTICAL RECEIPTS,

AND COLLATERAL INFORMATION IN THE

Arts, Manufactures, Professions and Trades, including Medicine, Pharmacy and Domestic Economy. Designed as a Comprehensive Supplement to the Pharmacopœia, and General Book of Reference for the Manufacturer, Tradesman, Amateur, and Heads of Families.

SIXTH EDITION. Revised and partly rewritten by
RICHARD V. TUSON, Professor of Chemistry and Toxicology in the Royal Veterinary College.

COMPLETE IN TWO VOLUMES, 8vo, 1796 PAGES. WITH ILLUSTRATIONS. PRICE, \$9.00.

COOLEY'S CYCLOPÆDIA OF PRACTICAL RECEIPTS has for many years enjoyed an extended reputation for its accuracy and comprehensiveness. The sixth edition, now just completed, is larger than the last by some six hundred pages. Much greater space than hitherto is devoted to Hygiene (including sanitation, the composition and adulteration of foods), as well as to the Arts, Pharmacy, Manufacturing Chemistry, and other subjects of importance to those for whom the work is intended. The articles on what is commonly termed "Household Medicine" have been amplified and numerically increased.

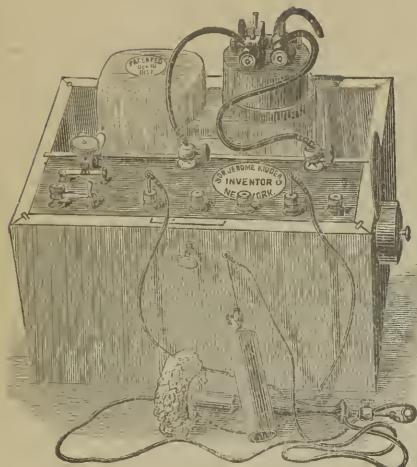

"The great characteristic of this work is, then, its general usefulness. In covering such diverse subjects, the very best and most recent research seems to have been sought for, and the work is remarkable for intelligent industry. An estimate of the value of two volumes of some 1800 closely-printed pages can hardly be arrived at when they are skimmed over in the usual perfunctory manner, but some necessity having arisen on the part of the reviewers to consult these volumes, brought quite into prominence the fact that the material was excellent and up to the times. . . . It is hardly possible to attempt to indicate alphabetically the list of topics. Sufficient it is to say that from an abattoir to zorconium nothing has been left out. This very complete work can, then, be highly recommended as fulfilling to the letter what it purports to be—a cyclopaedia of practical receipts."—*New York Times*.

"It is a well-edited special work, compiled with excellent judgment for special purposes, which are kept constantly in mind. If it is more comprehensive than its title suggests, that is only because it is impossible to define the limits of its purpose with exactitude, or to describe its contents upon a title-page. It seems to over-step its boundaries only in those cases in which its subjects belong in part within and in part without the territory that the work is intended to cover. In such cases a little more is given than the reader has a right to demand, but not more than he is likely to want. Illustrations of the text are freely used, and the mechanical execution of the work is excellent."—*New York Evening Post*.

"The book may be characterized in a word as a sort of domestic cyclopaedia, containing in the articles alphabetically arranged information on all sorts of topics related to home life, and information put not in an abstract way, or for mere scientific information, but in a concrete way, and for the practical service of the household. Turning over the pages, to give our readers some conception of the book, we find in it such articles as Acetic Acid, which gives the sources from which and the methods by which it is procured, and its uses and dangers; Adulteration, which, besides a very brief history of adulterations, gives in alphabetical order a list of the articles most commonly adulterated, with the names of the substances used for that purpose; Ague, which states the symptoms and external causes of the disease, and briefly suggests methods of prevention. These articles may serve as types, to give the reader some idea of the general spirit and character of the book for the manufacturer, the storekeeper, and the household. It is an exceedingly valuable book of reference."—*The Christian Union*.

WAS organized in 1865, for the purpose of promoting Life Insurance among Friends in the United States. It is similar in its organization to the Friends' Provident Institution of England, a company which has been in operation for more than forty years and which has taken high rank among the life insurance companies of that country. The Provident Life and Trust Company of Philadelphia is not confined in its operations to Friends, its benefits being extended to all others of like careful habits. Its claims to public confidence and patronage are based upon the superior longevity of its members, the care exercised in the investment of its funds, and the strict economy with which its affairs are managed. Its assumption of superior longevity is fortified by its own experience, and by the admitted fact that Friends, owing to their moderate and temperate habits, exhibit an exceptional average length of life. The effect of a low rate of mortality, both upon the security and cheapness of insurance in the Provident, is too obvious to need comment or explanation.
